

CEI Orientation — Year 3 & Year 4 Roadmap

Organised from voice recording — July 2026 orientation.

Overview of Required & Elective Components

Component	When	Credits	Grade	Duration
CEPP	Y3S2	1	A/B/C	1 semester
Internship	After Y3S2 (break)	0	S/U	≥2 months
Cooperative Study	Y4S1	6	A/B/C	≥4 months
Capstone Project 1	Y4S1	3	A/B/C	1 semester
Capstone Project 2	Y4S2	3	A/B/C	1 semester
Oversee Training	Y4S1	6	A/B/C	1 semester
Study Abroad	Y4S1	6	A/B/C	1 semester

- **CEPP and Internship are mandatory for everyone.**
- For Y4S1 you must pick **one** of: Cooperative Study, Capstone Project, Oversee Training, or Study Abroad.
- Coop and Capstone are the two main tracks; you do **either** coop **or** capstone (not both).

1. CEPP (Computer Engineering Preliminary Project)

When: Y3S2, but you can start preparing now (July).

- Group of **3** (can be more).
- Choose a topic, then find an advisor.
- Meet with advisor weekly or regularly.
- Submit a proposal/report at the end of the semester.
- At the end, give a presentation and receive comments.
- **1 credit** (according to orientation, 2 credits in the curriculum document), graded A/B/C.
- Think of it as a "mini capstone" — a project simulation.
- A Google Classroom for CEPP will be announced soon.

If someone in your group later decides to go for Coop instead of Capstone, that is fine — groups can be rearranged later.

2. Internship

When: After Y3S2 (summer break, not overlapping with a regular semester).

Duration: Minimum **8 weeks (2 months)**.

Credits: 0 (required but no credits), graded **S/U**.

Registration: Opens in April. No tuition fee.

Deadlines

- Submit internship report and diary by **15 July** (15 days to prepare after finishing).
- All paperwork must be submitted before going.

Section IDs (register in the correct group!)

Section ID	Who
901	2nd & 3rd year students
902	4th year students expected to graduate
903	International internship / exchange abroad

Registering in the wrong group = Grade I (Incomplete).

Documents — Internship

Fill **SI101** and **SI201**.

Combine with: student ID, resume, transcript.

Send to **Dr. Kanut** for signature.

Then send to **P'Ploy** via email.

Student Affairs will issue an **acceptance form**. You must:

- Ask the company to fill it in.
- Return it to Student Affairs.
- Student Affairs will then send the official internship placement letter to the company.
- *You may need to juggle forwarding documents between parties.*

During Internship

- Keep a **diary** with daily time-in / time-out.
- Report weekly or regularly on what you did.
- Maximum **3 days sick and personal leave** (requires medical certificates submitted with the diary).

- 3 late arrivals = 1 absence.
- Do **not** take company secrets outside — write something generic in the diary if needed.
- Work schedule depends on the company (6-day work week, holidays, etc.).

Internship + Coop at Same Company

If you do both at the same company:

- Internship: 2 months (SI documents).
- Coop: 4 months (COOP documents).
- **Keep the documents completely separate.**
- Total = 6 months.

3. Cooperative Study (Coop)

When: Y4S1

Duration: 4 months (full semester).

Credits: 6 (equivalent to Capstone 1 + 2).

Grade: A/B/C.

Constraints

- If you register for Coop, Oversee Training, or Study Abroad, you **cannot** register for any other courses.
- No leave exceeding **10%** of total work time.

Documents — Coop

Before going:

Find a company and get their acceptance.

Fill **COOP 101, 102, 103**.

Send to **Prof. Kanut** to sign.

Combine with transcript and student ID.

Send to **P'Ploy**.

An acceptance form will be issued; you must:

- Have the company sign and return it to you.
- Return it to the university.

During and after Coop:

- During: submit **COOP 104, 105**.

- After: submit a **report** and **poster** (a format/template will be provided).
- The CE department may require you to **present** the project you did with the company.
- There will be a **university visit** at the company.

Timeline

- Around July, P'Ploy will combine documents and send them to the Line group.
 - Some files come from Student Affairs after you submit COOP 101/102.
 - Grades are announced around **December or January** after assessment.
-

4. Capstone Project

When: Y4S1 (Capstone 1) and Y4S2 (Capstone 2).

Credits: 3 + 3 = 6 total.

Grade: A/B/C.

- You can **continue** your CEPP plan into Capstone 1.
 - **Capstone 1:** Submit report and do presentations at the end of the semester.
 - **Capstone 2:** Harder than Capstone 1; includes a **demonstration** and a **final report**.
 - If doing capstone with a professor, you **can** also register for GenEd courses.
-

5. Other Y4S1 Options

Oversee Training

- Credits can be transferred to: internship, free GenEd, possibly Coop.
- Can be done in Thailand or abroad.

Study Abroad

- Rare option; most students do Coop or Capstone.
-

6. Supervisor Requirement

In Y4, **regardless of which track you choose** (Capstone, Coop, Oversee Training, or Study Abroad), you will need a **supervisor** to assess your grade.

7. Finding a Company

- Start looking from **Y3S1** (now!).
 - If you don't do the internship in the planned time, it will affect your **honours**.
-

8. Scholarships

Scholarship	Amount	Where to Ask
OIA	40,000 THB	oia.kmitl.ac.th
School of Engineering	30,000 THB	facebook
CEI	20,000 THB	Ask P'Ploy

9. Important Reminders

- For internships you find yourself, you may apply to multiple places.
- Internships obtained through a contactor (e.g. **Prof. Rathachai**) are **not cancelable** — do not apply elsewhere if you take one of these.
- All options (internship, coop, capstone, oversee training, study abroad) can be done in Thailand or abroad.
