

Introduction

First era

- No OS (before 1956)

Frontal view of the reconstructed Colossus at The National Museum of Computing, Bletchley Park (image from Wikipedia)

Next Era

[The concepts of OS started in 1956 at GM research lab.]

In this picture:

- DEC PDP-10
 - 1966-1983
 - OS: TOPS-10
 - Timesharing/Total Operating System-10

A Brief History of OS

Early Operating Systems:
Computers were very expensive
(1956 – 1960s)

Time-Sharing Operating Systems: Computers and People were Expensive (1960s – 1970s)

Today's Operating Systems:
Computers are cheap
(1980 – today)
