

Course Syllabus: Artificial Intelligence 1/2026 (International Program)

Instructor: Assoc. Prof. Dr. Kietikul Jearanaitanakij (kietikul.je@kmitl.ac.th)

Textbook: Artificial Intelligence: A Modern Approach

Line group:

Course material: <https://drive.google.com/file/d/1cfQs86kDk8P5TV5UN2gK4mzsM1XJiOan/view?usp=sharing>

Grading:

Course Assignments: 50% (Group)

Final Exam: 50% (Written exam, Closed book, Formula will be provided)

Course Assignment: Blind & Heuristic Searches

- Group of 6-7 students, arranged by yourself.
- Web application: The Romania-Map Pathfinding problem
 - Implement: 1 Blind search and 1 Custom Heuristic search.
 - Any arbitrary cities can be selected as the start and goal states.
 - Compare the runtime, space, and path cost between the blind and heuristic searches.
- Grading criteria: Creativity, Completeness, and Presentation skills.
- Due date:
 - 9 AM Tuesday, October 13, 2026
- Things to turn in:
 - Web App URL (Web app must be deployed onto a host computer)
 - A link to the GitHub repository must be provided within the web app.
 - Presentation clip link on YouTube (Approx. 10-15 minutes)
- Groups of 6-7 students, arranged by yourself.
- Link for creating your group:
